

NENY PGA Tournament Live Scoring Implementation

2022-2023 Season

The Northeastern New York PGA section upon the recommendation from the Tournament Committee and approval by the Board of Directors, will be launching blue golf live scoring for all sanctioned tournaments for the 2022 season. This will be a mandatory procedure to be followed by all competitors.

- A player from each pairing will be the designated scorekeeper in the group for the complete round.
- Upon registration at the first tee the scorekeeper will check-in using the NENY Blue Golf app and will have access to all scorecards.
- This player will update the scores hole by hole until the completion of the tournament.
- This will primarily allow for a live leaderboard throughout the event.
- For the 2022 season, staff will still print paper scorecards as usual that will be the official scorecard signed and returned at the scoring station.
- For the 2023 season, only digital scoring will be used with no paper scorecards other than events with host sites of known limited service. Each competitor will be responsible to be the scorekeeper of only one fellow competitor/scorecard (similar to how we do it now with paper). Blue Golf has the ability for digital signature approval in the app for score verification.
- The scoring app works with the phone on do not disturb mode so players will not be distracted by email, texts, and calls if they so choose.
- If you have not yet downloaded the blue golf app, please do so by searching NENY PGA and the photo below is what you should find in your search.
- If you need assistance logging into your Blue Golf app, please contact section staff.
